

Missing Link to Dr. Tim Anderson - "The Dirty War On Syria"

Syria, Lies and Videotapes

Syrias dictator Bashar al Assad and Russias dictator-president Vladimir Putin are responsible for the 250.000 people killed in the Syrian civil war. Bashar al Assad uses poisonous gas against his own people, bombs UN help convoys and attacks hospitals with bunker busters and barrel bombs.

NATO and it's allies Saudi Arabia and Qatar support moderate forces in Syria, so democracy, which will ultimately bring peace to the region, can prevail in the Middle East. A No-Fly-Zone is the best way to end the killing in Syria.

This is the US propaganda version transmitted 24/7 via the mainstream media. It is designed to enable another government change leading to another failed state. The simple technique used by the US empire is to repeat a big lies endlessly until most people believe they are the truth. It is a technique already described by Adolf Hitler in his infamous "Mein Kampf" as the propaganda method of choice.

We tend to believe nobody with an IQ higher than the average baboon will fall for this method in NATO countries. Communication experts tell us it was possible in Nazi Germany because of it's controlled media system which provided only the official propaganda to the recipients, no alternative views. And that's why this couldn't happen to us, living in the free world. Because the media system of the Western World is pluralistic by, which means there are a multitude of informations and opinions provided to the public. So just by paying attention for a while to our great media system we get the full picture of events and interpretations - and then we can make up our own mind as informed citizens and voters.

Really? Does anybody with an IQ higher than the average baboon think this is an appropriate description of our reality? Isn't it more like there is only a very narrow bandwidth of facts and interpretations "we the people" get to know? While the truth about these "humanitarian interventions" slowly bubbles to the surface through a sea of lies – while the empire is out to "throw another crappy country against the wall, just to show we mean business".

Isn't it true especially for the USA and it's vassals that a war out of ulterior motives is always preceded by propaganda campaign in the mainstream media? Remember the weapons of mass destruction in Iraq, remember the destruction of Lybia, the country which once had the highest standard of living in Africa, remember the coup in Egypt, remember the coup in the Ukraine, remember the birth of ISIS. Not to speak about Mossadegh in Iran, Arbenz in Guatemala, Sukarno in Indonesia, the gulf of Tonkin incident and the Vietnam war, Allende in Chile etc.

The antidot to this choir of lies are lone, dissident voices, which are rarely heard - like Dr. Tim Anderson. His book "The Dirty War against Syria" is shockful of disturbing information and brilliant

analysis. As any dissident daring to kick against the pricks Dr. Anderson has to cope with a smear campaign. He was called Tim “Assad” Anderson simply for a balanced view on the conflict, simply for not only finding the usual suspects but doing thorough research.

Tim Anderson reveals some of his most important insights in this interview with Dirk Pohlmann. We hope it raises enough interest and viewers will research some of the topics for themselves - while reading his highly recommended book “The Dirty War on Syria”.
